Dónde obtener software libre en Cuba

En esta página podrá encontrar un listado de algunos lugares en Cuba a donde podría dirigirse para copiar Software Libre. Coordine su visita con las personas que se ofrecen a copiarlo, y precise exactamente qué necesita, pues en ocasiones dichas personas tienen el software en sus hogares y deben copiarlo para llevarlo al centro de trabajo.

Si dispone de software libre y desea agregarse a este listado, envíe [la información pertinente](#), o si prefiere colaborar más activamente, [solicite su registro en la Wiki](#) e incluya usted mismo su información en esta página.¹⁾ Preferiblemente, detalle las versiones y arquitecturas del software libre que posee, y el espacio aproximado que ocupa en MiB (megabytes binarios), para que los interesados puedan reservar el espacio suficiente para copiarlo.

Nota importante: Es permisible incluir en este listado **freeware** para sistemas operativos libres, pero debe aclararse de manera explícita. En cuanto a los productos comerciales, el GUTL se opone firmemente a la piratería, por lo cual **queda terminantemente prohibido colocar en este listado software comercial**. (Si es un producto comercial, debe haber una manera legal de obtenerlo).
